The River Raft Boat is one of our main products with the annual output of more than 1000pcs. Customized design is acceptable. We will present the unique raft you like.

Main points:

1. **Bottom:** The single-layer bottom or double-layer bottom is chosen depending on the using condition. Single-layer bottom means there are reinforced patches on both sides of the only, while double-layer bottom means the whole bottom is reinforced. So the latter is more waterproof and durable. Please refer to below picture. Our customers from North America usually request double-layer bottom.

2. **Material:** We have PVC (0.9mm 1200D and 1.2mm 2000D) and Hypalon 1.00mm. Hypalon material surpasses because of its wear ability and anti-oxidation.
3. **Floor:** Our rafts have two types of floor. One is hand-made pvc floor which is undetachable, the other is air mat floor which is detachable. Details are as below:

4. **Accessories:** All accessories have many types for your choices. Also the place of D ring and
